

Individual Therapy, Family Therapy, & FITT:

Individual or Family Therapy improves mental health, navigates difficult emotions, and achieves personal/family goals. Provide specific diminished caregiver protective capacities and/or child's needs on referral for the therapist to focus on during sessions.

Family Intensive Treatment Team (FITT) is a six-month, CARF-accredited, outpatient program developed and funded by DCF to provide intensive team-based, family-focused comprehensive services for families with parental substance use to support their recovery and progress toward completion of their Case Plan. Parents are assigned a multidisciplinary team—including Individual Therapist, Wraparound Case Manager, and Peer Support Specialist.
